

Why choose Kerio WinRoute Firewall over Microsoft ISA?

**MORE THAN JUST SECURITY.
CONTROL USER INTERNET ACCESS.**

Better Productivity Enhancement Tools

- **Interactive web report** – Monitor employee Internet activity in real time
- **Clientless VPN** – Find, upload and download shared files with just a web browser
- **Web filter** – Stop Internet abuse by blocking non-work related web sites and applications

Better bandwidth management

- **Bandwidth limiter** – Conserve bandwidth usage for bandwidth-critical applications
- **Link load balancing** – Expand your bandwidth by combining multiple Internet connections

More Layers of Security

- **Advanced Peer-to-peer (P2P) blocking** – Prevent data leakage and harmful downloads from **P2P networks**
- **Block web objects (e.g. ActiveX, JavaScript, Java applets)** – Minimise unsuspected attacks from trusted web sites
- **Integrated anti-virus protection** – Filter viruses and worms from incoming and outgoing traffic

Lower Operational Costs

- **Self-contained server** – Kerio WinRoute Firewall runs without additional requirements; ISA requires AD and Windows 2003 Server
- **Simple management** – Enable anti-virus and web category filtering without additional installation; single interface for administration

AWARDS

“Very nice software firewall with anti-virus and web filtering.”
—Peter Stephenson

“Every feature that you can need and more.”
—CRN Integrator
